

DREAMWEAVER TUTORIAL VIDEO  
STUDY GUIDE  
BY YU-SYUAN LIN

### PURPOSE

This site will design to help teach Dreamweaver to beginners. Dreamweaver is a web page editor, designed to allow users to create web pages without having to write the HTML code by hand. I will teach how to add multimedia elements such as flash (.swf) file, quick time (.mov) file into html page, how to make frames, layout, css style list...etc. There are many people wanted to create their own site and this tutorial will be the first step to know how to use Dreamweaver to make their own personal style webpage.

### GOALS

The main goal for this site is to educate people how to create a basic website and publish it to the Internet for personal or business purpose.
